Sustainable development techniques have been implemented ensuring the best possible living environment for guests.

These include:

- ⊕ Solar powered gas heating for water
- ⊕ Windows and balcony doors that can be opened, providing natural cross ventilation reducing reliance on air-conditioning
- ⊕ Low energy sensor driven light fittings throughout the building;
- ⊕ Only the highest energy rating electrical appliances have been selected to increase energy efficiency
- ⊕ Double brick construction with significant thermal insulation properties;
- ⊕ Additional thermal insulation in the walls and roof to provide a stable climate.
